Join us on Lake Monona!
From May 21-23 2002, the National Water Quality Monitoring Council, in collaboration with many of our member organizations, will sponsor its third national conference at the beautiful Monona Terrace Community and Convention Center in Madison, Wisconsin. This meeting will provide participants with opportunities for sharing successes, discussing issues, networking with colleagues, and bringing new and innovative ideas back to their own programs. The conference agenda will include plenary speakers, paper presentations, panel discussions, interactive workshops, posters, exhibits, field trips, and facilitated discussion sessions. This will be a working conference where all participants will play a key role in identifying the issues and collective steps we need to take to build a water monitoring framework for the future!

Cosponsored by
USGS • USEPA • USFWS, Division of Environmental Quality • USDA, Clean Water Programs
River Network • Methods and Data Comparability Board • Lake Michigan Monitoring Coordination Council
Tennessee Valley Authority • Association of Metropolitan Water Agencies • Ground Water Protection Council
